

RSQC2 - What questions do you still have?

Turning collected data into useful information

Find below the open questions to question 3 that I gathered after my class session about researching for a literature review with Graduate Students (Spring 2015).

Cluster/highlight the answers by topic/theme in order to prepare the next class session with the Graduate Students. What would you focus on? What would be your next actions?

You can work in pairs or alone – take 2-3 minutes

1. How to start research?
2. How to gather relevant information?
3. Further clarification on the outline of the lit review
4. Tying lit review with actual topic of my research paper
5. What is structure of lit review – summary of article? Criticize article?
6. I am not really sure which library website to begin with when I started researching my project
7. Where do I begin doing my research?
8. I am just not sure in which direction my research should go. I will have to answer that question myself.
9. How to narrow your research down?
10. Having too many sources, organizing them and then, in a way, criticizing them can be the real challenge when there isn't necessarily a lot of time to complete the project
11. Still missing my main research question, but this helped me with formatting
12. Theories of methodology (probably more appropriate for prof ...)
13. I know how to use database/library already
14. In 5pages, how do I go about the review of 10 authors, just summarize them?

15. What are other means of original research we can use in our papers?

16. How would you begin research?
