

A top-down view of a cluttered wooden desk. In the center is a silver laptop with a black keyboard. To its left is a tablet displaying a website with '100%' and 'Graduation' visible. Above the laptop are several papers, including a yellow envelope with glasses resting on it. To the right of the laptop is a white mug filled with dark liquid. Below the mug is a black smartphone and a circular object with a geometric pattern. The background is a dark, textured wooden surface.

- Get involved

JSTOR ARTS & SCIENCES

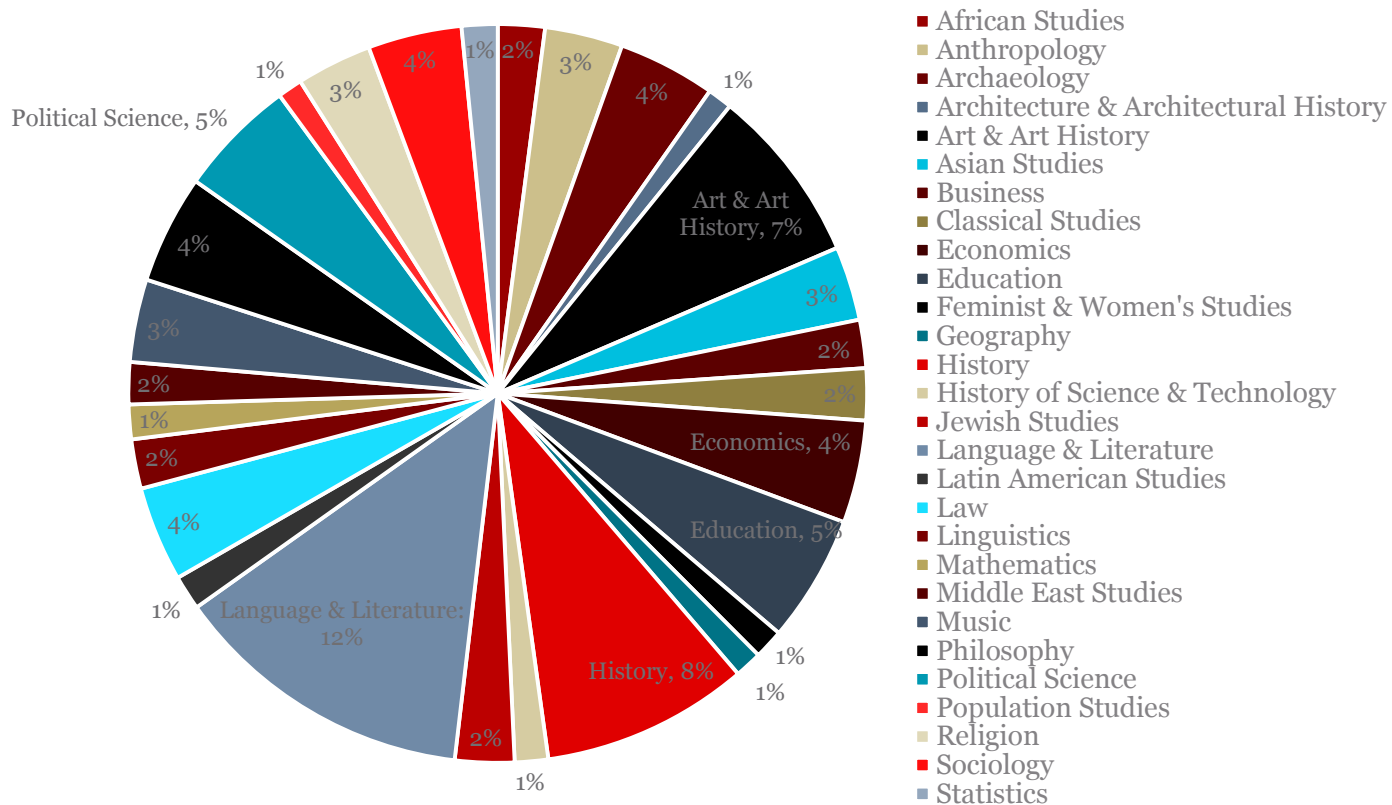

For 20 years, JSTOR has developed broad, multidisciplinary offerings that provide institutions with expansive coverage of influential titles in the humanities, social sciences and sciences.

Taken together, the Arts & Sciences collections represent how scholarship happens across disciplines and around the world.

Collections I-XV

- Minimum of 2,160 titles at completion.
- Cover more than 30 disciplines, with particular strengths in History, Language & Literature, Economics, Political Science and more.

JSTOR ARTS & SCIENCES

THE NEXT 20 YEARS

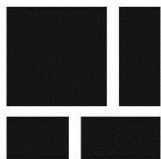

Guiding Principles...

- *Innovation*
- *Community Engagement/Partnership*
- *Diverse Content*
- *Impact*

I T H A K A

ITHAKA is a not-for-profit organization that helps the academic community use digital technologies to preserve the scholarly record and to advance research and teaching in sustainable ways.

Labs

A new-ish team at ITHAKA with an intense focus on user-based discovery and engagement dedicated to partnering with labs, libraries and publishers to seek out new concepts and opportunities and to refine and to validate them through research and experimentation.

Start your research here

JSTOR Sustainability is a digital library of academic research covering issues of environmental stress and its challenges for human society.

TRENDING TOPIC OVERVIEWS

AQUACULTURE

Aquaculture, also known as aquafarming, is the farming of aquatic organisms such as fish, crustaceans, molluscs and aquatic plants. Aquaculture involves cultivating freshwater and saltwater populations under controlled conditions, and can be contrasted with commercial fishing, which

URBAN SPRAWL

Urban sprawl or suburban sprawl describes the expansion of human populations away from central urban areas into ...

SOIL EROSION

BIODIVERSITY

Biodiversity is the degree of variation of life. This can refer to genetic variation, species variation, or ecosystem variation within an area, biome, or planet. Terrestrial biodiversity tends to be highest near the equator, which seems to be the result of the warm climate and high primary

- » A new curated multidisciplinary collection of 130+ journals drawn from more than 20 disciplines
- » Enhanced by research reports from leading think tanks around the world
- » Tested and build in partnership with librarians and scholars
- » Complemented by the strong base of content already in JSTOR – more than 200,000 articles that address issues in sustainability
- » Enriched by specialized tools geared to the interdisciplinary research, including over 700 “topic pages”

GREENHOUSE GASES OVERVIEW

A greenhouse gas (sometimes abbreviated GHG) is a gas in an atmosphere that absorbs and emits radiation within the thermal infrared range. This process is the fundamental cause of the greenhouse effect. The primary greenhouse gases in the Earth's atmosphere are water vapor, carbon dioxide, methane, nitrous oxide, and ozone. Greenhouse gases greatly affect the temperature of the Earth; without them, Earth's surface would average about 33 °C colder, which is about 59 °F below the present average of 14 °C (57 °F). Since the beginning of the Industrial Revolution (taken as the year 1750), the burning of fossil fuels and extensive clearing of native forests has contributed to a 40% increase in the atmospheric concentration of carbon dioxide, from 280 ppm in 1750 to 392.6 ppm in 2012. It has now reached 400 ppm in the northern hemisphere. This increase has occurred despite the uptake of a large portion of the emissions by various natural "sinks" involved in the **carbon cycle**. Anthropogenic carbon dioxide (CO₂) emissions (i.e., emissions produced by human activities) come from combustion of carbon-based fuels, principally wood, coal, oil, and **natural gas**. Under ongoing **greenhouse gas emissions**, available Earth System Models project that the Earth's surface temperature could exceed historical analogs as early as 2047 affecting most **ecosystems** on Earth and the livelihoods of over 3 billion people worldwide. Greenhouse gases also trigger ocean bio-geochemical changes with broad ramifications in marine systems in the Solar System, the atmospheres of Venus, Mars, and Titan also contain gases that cause a greenhouse effect, though Titan's atmosphere has an anti-greenhouse effect that reduces the warming.

Source: Wikipedia

The diagram illustrates the greenhouse effect. It shows solar radiation (100 units) entering the Earth's surface. The Earth's surface reflects 10 units and emits 90 units of thermal radiation into the atmosphere. The atmosphere reflects 10 units back to the Earth's surface and emits 80 units to space. The net result is that the Earth's surface is 33 °C warmer than it would be without the atmosphere. The diagram is labeled "The Greenhouse Effect" and "Source: Wikimedia Commons".

UNDERSTANDING SHAKESPEARE : FOLGER PARTNERSHIP

Folger Shakespeare Library

- Folger Digital Texts
- *Shakespeare Quarterly*
- Scholars and students

Objective: demonstrate the value of Folger Digital Texts to scholars and students and demonstrate how it can be cross-referenced with Shakespeare Quarterly.

JSTOR

- The full archive run of SQ
- 2000+ other journals
- A newly-formed Labs team

Objective: validate the value of using a primary text as a portal into secondary literature.

Folger's Digital Text for *Midsummer Nights Dream* - Act 3 Scene 2 # of articles

Articles on JSTOR quoting "Lord, what fools these mortals be!"

91 *A Midsummer Night's Dream*

ACT 3, SC. 2

ROBIN

FTLN 1123 Captain of our fairy band,
 FTLN 1124 Helena is here at hand,
 FTLN 1125 And the youth, mistook by me,
 FTLN 1126 Pleading for a lover's fee.
 FTLN 1127 Shall we their fond pageant see?
 FTLN 1128 **Lord, what fools these mortals be!**

OBERON

FTLN 1129 Stand aside. The noise they make
 FTLN 1130 Will cause Demetrius to awake.

ROBIN

FTLN 1131 Then will two at once woo one.
 FTLN 1132 That must needs be sport alone.
 FTLN 1133 And those things do best please me
 FTLN 1134 That befall prepost'rously.

[They step aside.]

Enter Lysander and Helena.

LYSANDER

FTLN 1135 Why should you think that I should woo in scorn?
 FTLN 1136 Scorn and derision never come in tears.
 FTLN 1137 Look when I vow, I weep; and vows so born,
 FTLN 1138 In their nativity all truth appears.

BOOKS AT JSTOR

books.jstor.org

Authoritative scholarly
ebooks—now easier than ever

BOOKS AT JSTOR

PROGRAM OVERVIEW

High-Quality Academic eBooks

- More than 41,000 titles
- New titles are added every week

Renowned Publishers

- 100+ Publishers and University presses as well as scholarly associations and public policy organizations

Perpetual Access

- Perpetual access for all purchased books on JSTOR
- No platform fee for archive participants

Seamless Integration with Journals

- Books, journals, and reviews are cross-searchable and linked on the same platform

Unlimited, DRM-Free Access

- No limits on simultaneous use, downloading, printing, or copy/paste
- No need to log in or use special software
- Read chapters online or download PDF files that never expire

BOOKS AT JSTOR DISCOVERY AND ILL

OCLC MARC records

- Free, high-quality MARC records delivered through OCLC Collection Manager
- Available to all Books at JSTOR participants
- Simple management of MARC records, including differentiation between titles in DDA profile and titles that have already been paid for
- Set up preferences for record delivery and alerts

Discovery services

- Ex Libris - Primo
- ProQuest - Summon
- EBSCO Discovery Service
- OCLC WorldCat Discovery

Interlibrary loan

- Interlibrary loan is permitted for book chapters

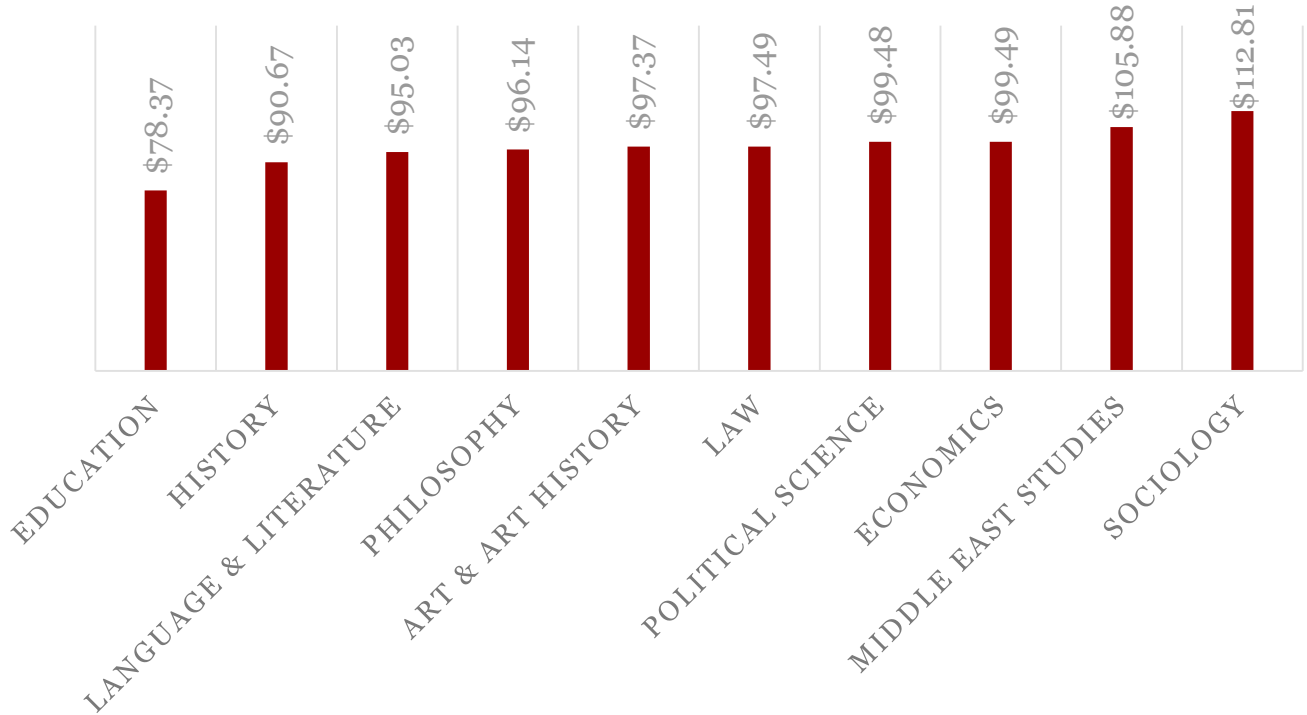

BOOKS AT JSTOR

SUBJECT COLLECTIONS

Frontlist Subject Collections

An easy way to acquire newly-published content from leading presses in key disciplines where students and faculty heavily rely on JSTOR:

- Business & Economics
- Film Studies
- History
- Language & Literature
- Philosophy
- Political Science
- Religion
- Science & Technology
- Sociology

Sustainability Collection

- Interdisciplinary collection includes titles in environmental science, public policy, urban studies, agriculture, and more
- Titles have received such honors as the APSA Lynton Keith Caldwell Prize and Choice Outstanding Academic Titles

Plants Collection

- Includes titles in botany; biodiversity, conservation & ecology; forestry; garden & landscape design; and useful plants

BOOKS AT JSTOR

DEMAND-DRIVEN ACQUISITION

Customized Profiles

- Build a profile of titles to make available for discovery
- May include all titles, or a subset based on parameters such as **publisher, discipline, publication date, or price**

Seamless User Experience

- Titles appear just like purchased content to users, and may be viewed and downloaded as if they were already paid for

A Generous Trigger

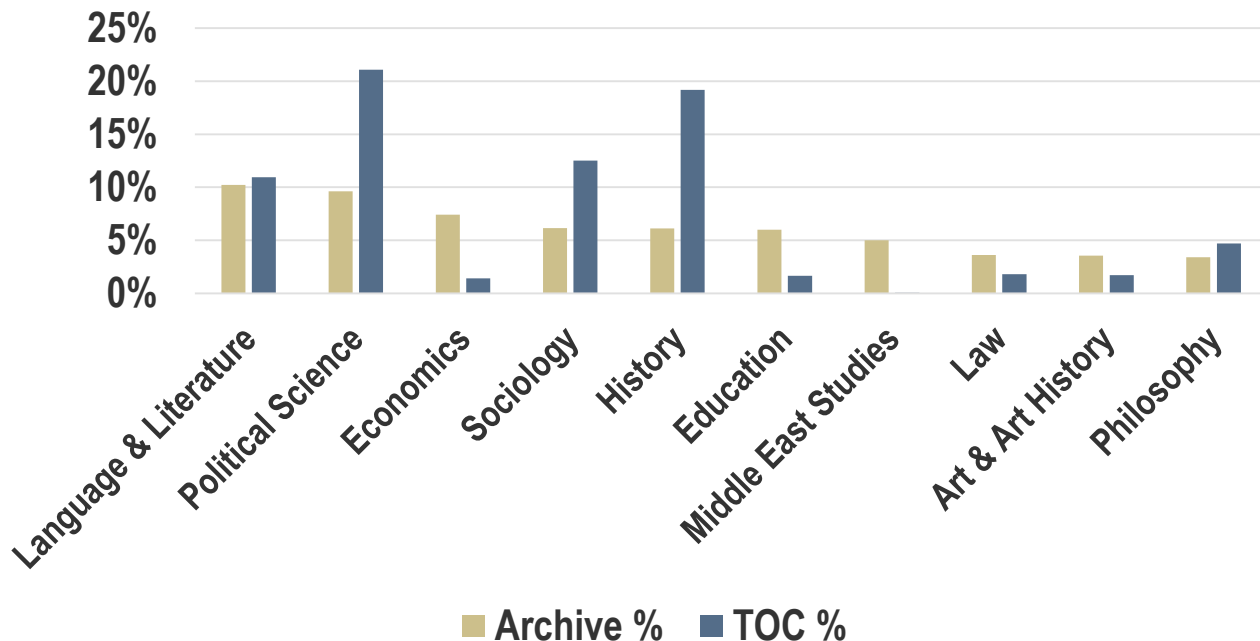

- Purchase of perpetual access is triggered when usage reaches 6 chapter views or 4 chapter downloads

Free Usage Below the Trigger

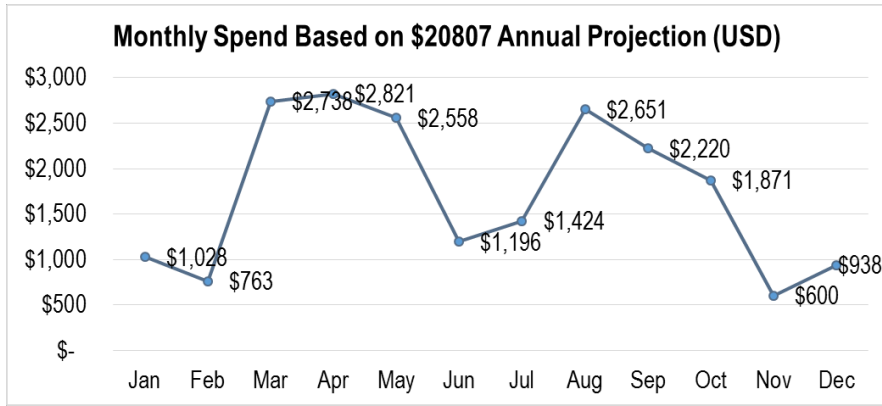

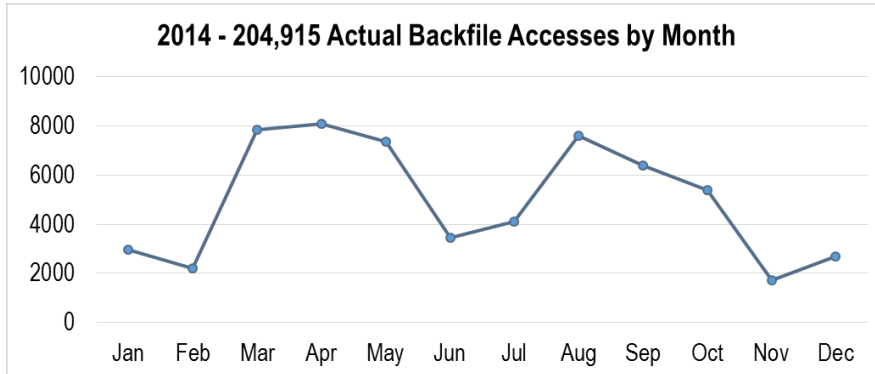

- All usage below the trigger is free
