What's a CRIS?

Current Research Information System

Collects metadata of research outputs and activities

Publications, projects, datasets, prizes, news media, service, etc.

Creates individual researcher profiles

Curated by library staff and/or researchers

Helps the university

Understand

Analyze

Communicate the research

Central European University Research Portal

University Research Profile

Central European University is an institution of advanced research and teaching, dedicated to socially and morally responsible intellectual inquiry. CEU is committed to promoting the values of open society and self-reflective critical thinking. It aims at excellence in the mastery of established knowledge, courage to pursue the creation of new knowledge in the humanities, the social sciences, law and management, and engagement in promoting applications for each, in particular through their policy implications.

UN Sustainable Development Goals

In September 2015, 193 countries agreed to adopt a set of global goals to end poverty, protect the planet and ensure prosperity for all. Click on a goal to the right to explore how our researchers and their

Research interests

Tim Crane is Pro-Rector for Foresight and Analysis and Professor of Philosophy at CEU. Before coming to CEU he was Knightbridge Professor of Philosophy at the University of Cambridge and a Fellow of Peterhouse from 2009. Before that he taught at UCL for 19 years, and founded the Institute of Philosophy in the University of London as its first Director in 2005. He was educated at the Universities of Durham, York and Cambridge, where he obtained his PhD in 1989.

🞂 Overview   **⊛ Fingerprint**

Abstract (may include machine translation)

Philosophers often defend their views by pointing to the unacceptability of what they take to be the only alternative. So, for example, materialists sometimes defend their view of the mind by contrasting it with the inadequacy of dualist views which treat the mind as an immaterial substance. The idea of immaterial substance is scientifically challenging, obscure, mysterious or even incoherent. This can be part of what moves them to accept a materialist view of the mind.

CRIS and the Scholarly Communication Eco-System
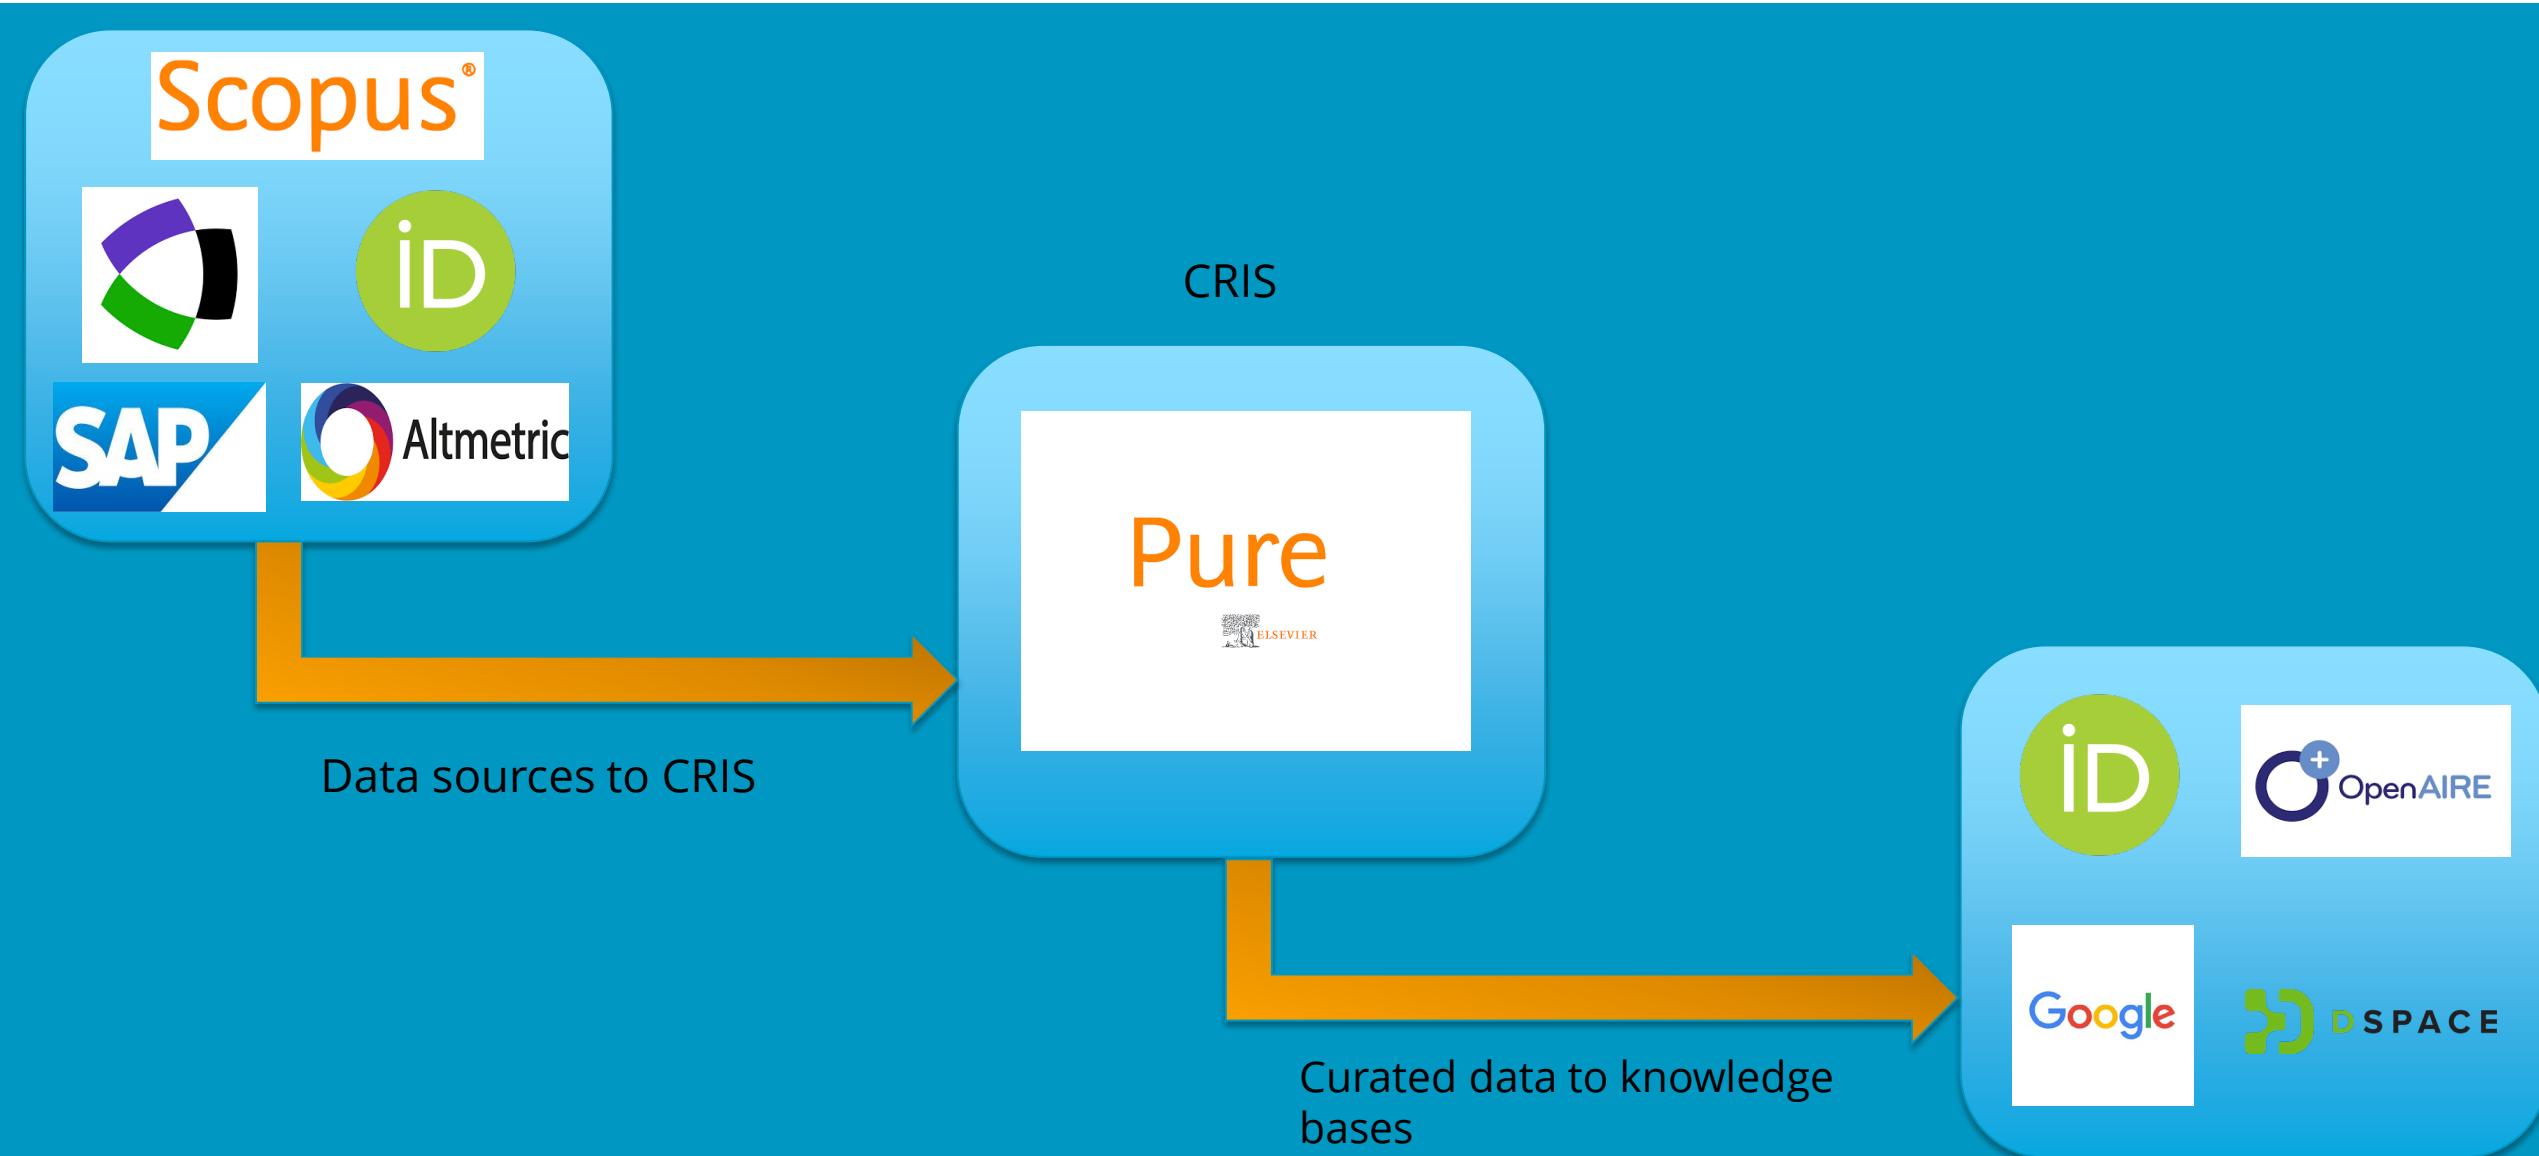

Implementation and Next Steps

Implementation Schedule

Oct. 2023

Implementation start

January 2024

Harvested 5,000 publications from Scopus

June 2024

Internal release
- Researchers update profiles

September 16, 2024

Go live

Loaded researchers/org units from SAP SF

December 2023

March - June 2024

Refining research profiles

11,000 publications collected

September 10, 2024

Adding new content
Data quality
Pushing to aggregators

2025 -

Now

- Continue to add and curate research outputs (over 12K) via import sources, manual input, and user submissions

- Datasets, Activities, and Projects are also available

- Data Cleaning and De-duplication

Next

- Grants, Projects, Reporting, Research Impact

- New Data Sources, e.g., Social Sciences, Media, and News Databases

- Other Integration Options, e.g., DMP tool

Lessons learned

Data Quality

Don't underestimate the importance of good-quality data (Think quality not quantity)

Don't fully trust external sources

Curate, Curate, Curate

User Engagement

Make a Good First Impression

Create and Demonstrate Added Value

Be Ready to Take a Flexible Approach

Communication

Engage with Researchers and University Administration

Be Mindful of Common Concerns

Keep Reminding

THANK YOU
